

Apollo^{XD}

1.5 Second curing

Turbo 8mm light guide

The high quality turbo fibre optic light guide maximises lightwave emission and offers access to posterior procedures.

Excellent heat dissipation

Apollo XD's body is made from industrial grade aluminium for robust durability and excellent heat dissipation.

Enhanced battery module

Featuring a high performance lithium-ion cell. Built to medical grade for extended battery life.

Advanced control with LED display

A simplified design featuring a silicone dual control button to easily switch power, mode and time settings then activate the light.
